Bio Response

Our Services

# Professional Fire and Smoke Restoration

Whether you've recently experienced a fire in your home or a commercial property, fire damage can have a significant impact on the building, leaving serious damage to the structure of the building as well as leaving the property entirely uninhabitable.

We understand that fire damage needs to be dealt with prior to the building being reoccupied and this alone could cause financial loss as well as further deterioration of the building so we make it our mission to help you recover as quickly as possible.

## Professional support available when you need it most

As a leading provider of emergency cleaning services, our teams are ready to respond to fire damage situations 24 hours a day, 7 days a week. Our professional teams are fully insured, are equipped with the latest in specialist cleaning equipment and have been trained to handle a wide range of fire and smoke damage situations.

Fire and smoke damaged buildings can cause serious medical implications if not handled immediately so we've developed comprehensive risk assessments to safeguard our clients, the building's occupants and our own staff.

Bio Response

Our Services

# Professional Flood and Water Damage Restoration

Following a flood, homes and commercial properties can be left decimated by the impact of water damage. Carpets, walls and furniture can absorb water quickly and make recovery extremely difficult without the right training and equipment.

Bio Response have invested in specialist drying equipment manufactured by Corroventa and training courses for our team to allow them to offer the best solution for all water damage situations.

We are BDMA certified and are available 24 hours a day, 7 days a week for your emergency flood cleaning requirements.

Our Services

# Professional Mould Remediation

Mould can be incredibly dangerous if left untreated, and can lead to a multitude of health problems for those who inhabit the mould contaminated property, including respiratory issues and in extreme cases, death.

At Bio Response, we can carry out mould cleaning and treatment in your affected property to ensure that your property it safe to enter and use. Whether you need mould remediation services for commercial buildings or a private home, Bio Response have got you covered.

A mould infestation can take up residency in just about anywhere in a building, especially if the building or property has been previously subjected to flooding, water leaks or damp. Why let your mould get to the stage where it becomes hazardous? Bio Response can provide you with a simple solution to get rid of mould with our mould remediation services.

> **Be safe, not sorry -** mould is hazardous

Bio Response

Our Services

# Professional Sewage Remediation

At Bio Response we know all too well that spills of sewage smell awful, are unsightly and can seriously disturb your household or place of business. Numerous bacteria, viruses, fungus, as well as parasites which can lead to serious sickness and even fatality can be present in raw sewage.

Unknown compounds including chemicals, toxins, and pesticides pose a very high danger of contamination to humans.

Additionally, dangerous, poisonous, asphyxiating, and combustible gases in an enclosed space could have catastrophic consequences for both the environment as well as the nearby water system.

Spillages from sewage pipelines can spread very quickly, so it is crucial to treat any spills immediately to limit exposure and stop the spread.

## Our Services

# Asbestos Removal

When it comes to safe and compliant asbestos removal, Bio Response Asbestos is your trusted UK partner.

**We manage:**

- ✓ Asbestos Insulation Board removal
- ✓ Asbestos Thermal Insulation removal
- ✓ Complex asbestos projects and Environmental Clean

With Bio Response Asbestos, you benefit from meticulous risk assessment and full regulatory compliance, guaranteeing the safety of your property and occupants.

**Non Licenced Asbestos Removal**

Not all asbestos removal tasks require a licence, but they still demand skill and diligence. We handle non licenced asbestos removal, including:

- ✓ Asbestos Cement products
- ✓ Floor Tiles and Composites
- ✓ Textured coatings
- ✓ Gaskets & Ropes containing asbestos

Our team follows strict safety protocols to remove asbestos efficiently, protecting your health and the environment every step of the way.

> **Safely Clearing the** Past for a Healthier Future

Bio Response

Our Services

# Trauma and Crime Scene Cleaning

Trauma and crime scene cleaning involves a complete clean-up process and removal of contaminated items. Items within the area can be cleaned or disposed of, however we also cover any contamination with the likes of tissue matter, blood, or bodily fluids.

In many cases where there has been an accident, a suicide or even a murder, cleaning up can be your responsibility. It's easy to assume that clearing up any blood or fluids will be done by the police or the government, but this isn't true. It's often the family of the victim or the owner of the property that needs to take care of this.

> **It's often the family of the victim or the owner of the** property that needs to take care of this.

Our Services

# Bird Guano Removal

Bird guano refers to the excrement produced by birds and can vary in consistency, depending on the species of bird. However, regardless of the consistency, bird guano is a potential health hazard and can cause serious illness if not properly cleaned up. The droppings can contain a range of dangerous pathogens, including salmonella, E. coli, and histoplasmosis.

In addition to the health risks, bird guano can also cause damage to buildings and structures, especially if left unattended for a long period. The acidity in the droppings can erode metal and masonry, causing significant structural damage over time.

Our Services

# Extreme Cleaning

Many cleaning jobs that we undertake are not easy or pleasant, and no regular cleaning service will be able to manage the work. However, we're trained and prepared to take on the work that others won't.

Our range of extreme cleaning services cover hoarder clean up and unexpected death clean up among other things. When you hire us, you can guarantee that deep cleaning will be carried out thoroughly and meticulously.

One of our biohazard cleaning options is a professional needle pick up. This involves needle stick removable and disposing of syringes as well as needle sweeps and ensuring that any sharps or blades are removed. We also cover other sorts of medical or biohazard waste that needs removing.

> **We are extensively trained and equipped** to carry out a range of extreme cleans

Bio Response

Our Services

# Professional Graffiti Removal

It's essential to understand the different types of graffiti and the best methods for removing them. The three main types of graffiti are spray paint, markers, and stickers.

**Spray Paint –** Spray paint is the most common type of graffiti and can be particularly challenging to remove. It's crucial to identify the type of spray paint used and the surface it has been applied to before attempting removal.

**Markers –** Markers can be made with a variety of inks, ranging from water-based to oil-based. The type of marker used will determine the best method of removal.

**Stickers –** Stickers or tags can be particularly challenging to remove, especially if they have been in place for a long time. The best method for removing them will depend on the type of surface they are applied to and the type of paint used.

> **The three main types of graffiti are** spray paint, markers, and stickers.

Our Services

# Professional Oil Spillage Cleaning

Calling in professionals straight away is essential if an oil spill occurs. The longer you leave an oil spillage, the more the contaminated area will suffer from the impact – not to mention the negative effect it will have on the environment and everyone in the vicinity.

With time, the costs and complications associated with oil spill clean-ups can increase dramatically, so acting quickly makes sense. Fortunately, the team here at Bio Response are on hand to help!

We have all the experience, knowledge, and equipment to clean up oil spills to a professional standard. Our highly trained technicians know precisely how to handle all types of chemical or oil spillage, and understand the importance of a speedy clean-up, putting safety at the heart of the process.

Our Services

# Professional Brick and Stone Cleaning

We know how important it is for a building to look attractive – after all, first impressions count, whether that building is your business or your home. That's why our team of qualified technicians pull out all the stops to provide the very highest cleaning standards to ensure your building looks its best at all times.

Stone and brick cleaning offers many aesthetic benefits. After our technicians finish work on your property, you'll see visible differences in your building's appearance. You can rest assured, too, that staff, customers, and visitors will certainly get the right impression from the moment they see your exteriors.

However, our stone and brick cleaning service also helps to identify any underlying problems such as cracks or missing points. We're also able to remove algae, lichen, and other damaging deposits.

Our Services

# Industrial Cleaning

When clients and customers visit your premises, it's crucial that they get the right impression from the get-go. That's why their overall look is so important. All areas should be tidy and clean in order to impress your visitors. Not only that but ensuring that your premises remain clean is cost-effective too, reducing your need to pay for damages to be repaired.

When our cleaning team get to work on deep cleaning your commercial premises, their primary objective is to make sure that its health and safety standard is not only met but also improved. Industrial areas are associated with many hazards, but out team of highly trained experts are able to spot any possible risks to humans and building structures alike.

> **primary objective is to make sure that its health and** safety standard is not only met but also improved.
